SUMMARY

Business and data analyst who builds analytics end to end, from raw data through modeling to a live dashboard, with a year of financial-data validation at a publicly traded company. M.S. Business Analytics (AI concentration), completed August 2026, and B.B.A. Finance. Python, SQL, Power BI, Tableau, Excel; explains analysis in plain language.

EDUCATION

M.S. Business Analytics, AI Concentration Aug 2025 to Aug 2026
University of Louisville · Louisville, KY · 3.94 GPA

B.B.A. Finance & Marketing, Minor in Business Analytics Aug 2020 to Mar 2024
University of Kentucky · Lexington, KY · 3.61 GPA · Dean's List

PROJECTS

Oddsix | Multi-Sport ML Prediction Platform oddsix.app

- Built and run a live platform covering six sports (NBA, NFL, MLB, soccer, NHL, and college) with 25+ years of historical plus current data, refreshed daily on an automated pipeline. Python (scikit-learn, LightGBM, pandas), SQL Server.
- Serves multiple engineered models, a stacked ensemble over 490+ features, with predictions benchmarked against published market lines. Own the whole pipeline solo, from raw data to live dashboard.
- Every prediction is posted and scored publicly, 72% over 290+; caught and rebuilt a model that was leaning on leaked data.

Customer Churn Analysis | Data to Recommendations github.com/SpencerGoss/customer-churn-prediction

- Analyzed 5,636 records, used SHAP to find the real drivers, and turned them into three plain-language segments with a prioritized action list.

Box Office vs. Ratings | ETL, Modeling, Dashboard github.com/SpencerGoss/box-office-vs-ratings

- Built an ETL pipeline pulling 5,659 records into a database with 7 automated data-quality checks, modeled how revenue moved against other signals, and surfaced the drivers in a live dashboard.

EXPERIENCE

Accounts Payable Specialist Aug 2024 to Jul 2025
Churchill Downs Incorporated · Louisville, KY

- Verified invoice data daily in SAP and JD Edwards across 10+ properties, checking amounts, vendor codes, and account classifications against source documentation and correcting errors before they reached reporting.
- Created accounts payable procedures and onboarding documentation and trained new hires on the system workflows; supported an automated invoice-processing rollout by validating the data behind it.

Warehouse Associate May 2020 to Aug 2023
Terex Corporation · Louisville, KY

- Shipping and receiving for a global heavy-equipment manufacturer; coordinated with drivers and sales teams to resolve order and delivery issues and trained new hires.

SKILLS

Analytics & Modeling Python (pandas, scikit-learn, LightGBM, XGBoost, NumPy), SQL (SQL Server, PostgreSQL), R, statistical and predictive modeling, feature engineering, ETL, data modeling, SHAP explainability

BI & Reporting Power BI, Tableau, Plotly, Excel (pivot tables, XLOOKUP, VLOOKUP), dashboards, KPI and trend reporting, turning analysis into clear recommendations

Systems & Tools SAP, JD Edwards, Git, JMP, SPSS, Qualtrics, large language models in daily use (Claude)

Business accounts payable operations, invoice and vendor master data validation, discrepancy resolution, process and onboarding documentation, data-quality checks, requirements gathering
