SUMMARY

MSBA candidate (AI concentration) at the University of Louisville with a Finance & Marketing background from UK. Built and shipped Oddsix, a multi-sport analytics platform whose public picks grade themselves at 72% across 290+ predictions; a film-analytics pipeline (TMDB API to a 3NF PostgreSQL database and dashboard); and a four-model churn study with SHAP-driven retention recommendations. I make the architecture and modeling calls and ship.

EDUCATION

M.S. Business Analytics, AI Concentration

Aug 2025 – Aug 2026

University of Louisville · Louisville, KY

- 4.0 GPA · College of Business Graduate Programs Scholarship recipient.

B.B.A. Finance & Marketing | Minor in Business Analytics

Aug 2020 – Mar 2024

University of Kentucky · Lexington, KY

- 3.61 GPA · Dean's List most semesters · UK Provost Scholarship · Humana Foundation Scholarship

EXPERIENCE

Accounts Payable Specialist

Aug 2024 – Jul 2025

Churchill Downs Incorporated · Louisville, KY

- Tagged and verified invoice fields (amounts, vendor codes, account classifications) used to train Relish AI's invoice-processing models.
- Maintained vendor master data across subsidiary properties and resolved payment discrepancies directly with vendor stakeholders.
- Created the AP team's onboarding reference, a step-by-step OneNote library covering Relish AI workflows, AP procedures, and edge cases, now used to train new hires.
- Processed 100+ invoices daily across 10+ Churchill Downs properties in JD Edwards and SAP.

Warehouse Associate

May 2020 – Aug 2023

Terex Corporation · Louisville, KY

- Advanced from parts picker into shipping and receiving for a global heavy-equipment manufacturer, handling both roles concurrently across 100+ daily packages.
- Coordinated with drivers and sales teams to resolve order and delivery issues. Earned forklift certification; helped onboard new hires.

PROJECTS

Oddsix | Multi-Sport Analytics Platform | oddsix.app

- Public sports analytics platform covering NBA, NFL, MLB, Soccer, NHL, and college. Live scores, player stats, standings, 25+ years of historical data, plus ML-powered game predictions with confidence scores.
- NBA model at 0.74 test AUC, tracking 72% across 290+ public picks. Stacked GBM + Logistic Regression ensemble over 490+ engineered features (Elo, RAPM, opponent-adjusted stats, clutch performance).
- Stack: Python (scikit-learn, LightGBM, pandas), SQL Server, Plotly, Chart.js; daily automated refresh.

Box Office vs. Ratings | Film Analytics · ETL → PostgreSQL → Dash

- ETL pipeline extracting 5,659 films from the TMDB API into a 3NF PostgreSQL database, with 7 data-quality checks and idempotent upserts, powering a live interactive analytics dashboard.
- Stack: Python (pandas, SQLAlchemy), PostgreSQL, Dash + Plotly. Live dashboard plus a recorded video walkthrough.

Customer Churn Prediction | MSBA Capstone Project

- Benchmarked four models on a 5,636-record dataset (CatBoost best, 0.899 AUC); SHAP analysis surfaced referrals, contract type, and tenure as the top churn drivers.
- Segmented customers into three retention clusters and delivered a prioritized at-risk list for the marketing team.

SKILLS

Languages Python, SQL, R

Analytics & ML machine learning, scikit-learn, pandas, NumPy, LightGBM, XGBoost, statistical modeling, data analysis, calibration, conformal prediction

Visualization data visualization, dashboards, Tableau, Power BI, Plotly, matplotlib, seaborn, ggplot2

Tools & Platforms Excel, JMP, SPSS, Qualtrics, SurveyMonkey, SAP, JD Edwards, PostgreSQL, GitHub, VS Code

AI & Automation Claude, ChatGPT, Gemini, Codex, GitHub Copilot, AI image generation, prompt engineering, agent design
