Louisville, KY | (502) 836-5593 | spencer.goss@outlook.com | [linkedin.com/in/spencergoss1234](https://www.linkedin.com/in/spencergoss1234) | github.com/SpencerGoss

SUMMARY

MSBA candidate at Louisville with an AI concentration and a Finance & Marketing background from UK. Designed and shipped Oddsix, a multi-sport analytics platform whose NBA model runs at 75% accuracy across 252 live-tracked games. Also architected and deployed a multi-asset algorithmic trading system live on Binance.US, plus a customer-churn capstone. End-to-end ownership: I make the architecture and modeling calls, direct implementation, and ship.

EDUCATION

M.S. Business Analytics, AI Concentration

Aug 2025 – Aug 2026

University of Louisville · Louisville, KY

- 4.0 GPA · College of Business Graduate Programs Scholarship recipient.

B.B.A. Finance & Marketing | Minor in Business Analytics

Aug 2020 – Mar 2024

University of Kentucky · Lexington, KY

- 3.61 GPA · Dean's List most semesters · UK Provost Scholarship · Humana Foundation Scholarship

EXPERIENCE

Accounts Payable Specialist

Aug 2024 – Jul 2025

Churchill Downs Incorporated · Louisville, KY

- Processed 100+ invoices daily across 10+ Churchill Downs properties in JD Edwards and SAP.
- Tagged and verified invoice fields (amounts, vendor codes, account classifications) used to train Relish AI's invoice-processing models.
- Built the AP team's step-by-step OneNote process library covering Relish AI workflows, AP procedures, and edge cases; used by new hires for onboarding.
- Maintained vendor master data across Churchill Downs subsidiary properties, tracked outstanding invoice payments, and resolved discrepancies directly with vendors.

Warehouse Associate

May 2020 – Aug 2023

Terex Corporation · Louisville, KY

- Started as a parts picker and expanded into shipping and receiving for a global heavy-equipment manufacturer. Handled both roles concurrently across 100+ daily packages.
- Coordinated with drivers and sales teams to resolve order and delivery issues. Earned forklift certification; helped onboard new hires.

PROJECTS

Oddsix | Multi-Sport Analytics Platform | oddsix.app

- Public sports analytics platform covering NBA, NFL, MLB, and Soccer. Live scores, player stats, standings, 25+ years of historical data, plus ML-powered game predictions with confidence scores.
- NBA prediction model running at 75% accuracy across 252 live-tracked games (test AUC 0.748, Brier 0.18). Architected the stacked GBM + Logistic Regression ensemble using 490+ engineered features (Elo, RAPM, opponent-adjusted stats, clutch performance).
- Stack: Python (scikit-learn, LightGBM, pandas), SQL Server, Plotly, Chart.js. Migrating frontend to Astro + React on Cloudflare Pages. Daily automated refresh.

Multi-Asset Algorithmic Trading System | Live on [Binance.US](https://binance.us)

- Architected and shipped a production trading system on [Binance.US](https://binance.us) with paper shadow mode for US equities (Alpaca). Risk controls: immutable kill switch at 20% drawdown, per-trade and weekly circuit breakers, HMAC-signed audit logs.
- Designed the signal pipeline: 21 signals (technical, ML, sentiment, macro, insider, institutional) feeding a 5-stage AI agent pipeline that evaluates every trade. Async Python with FastAPI.

Customer Churn Prediction | MSBA Capstone Project

- On a 5,636-record customer dataset, tenure and contract type came out as the top churn drivers. Built a gradient-boosted model and segmented customers into 3 retention clusters with a different strategy for each.

SKILLS

Languages Python, SQL, R

Analytics & ML scikit-learn, pandas, NumPy, LightGBM, XGBoost, Jupyter, statistical modeling, calibration, conformal prediction

Visualization Tableau, Power BI, matplotlib, seaborn, ggplot2

Tools & Platforms Excel, JMP, SPSS, Qualtrics, SurveyMonkey, SAP, JD Edwards, GitHub, VS Code

AI & Automation Claude, ChatGPT, Gemini, Codex, GitHub Copilot, AI image generation, prompt engineering, agent design
